ROHIT HADLAGERI

Bengaluru, India | +91 9113093917 | rohitahece2026@gmail.com | GitHub | LinkedIn

SUMMARY

Computer Science/Engineering graduate (2026) with hands-on experience in Python, SQL, REST API integration, and Generative AI/LLM-powered application design. Skilled at translating business requirements into working technical solutions using AI-assisted development, prompt engineering, and agent orchestration — seeking to apply these fundamentals to data engineering and AI-driven automation work.

SKILLS

- **Data & AI:** Python, SQL, pandas [add level], Generative AI (Gemini), LLM API integration, Prompt Engineering, RAG concepts, Agent Orchestration (AutoGen, MCP), embeddings [if applicable]
- **Backend & APIs:** FastAPI, REST APIs, WebSocket protocols, JSON payloads, Token/Auth management
- **Cloud & DevOps:** Azure (App Service, Functions, Container Apps, Cosmos DB, OpenAI), Firebase, Git, GitHub Actions (CI/CD), Agile
- **Also familiar with:** React.js, HTML/CSS, Bootstrap, Kotlin/Jetpack Compose (mobile)

WORK EXPERIENCE

Gen-AI Development Intern | Mind Matrix *Feb 2026 – Jun 2026*

- Integrated Gemini AI (LLM API) into production application features, applying prompt engineering to tune outputs — experience directly transferable to Azure OpenAI Service integration.
- Designed and consumed REST API endpoints with token-based authentication and structured JSON payload handling, cutting integration defects by [X]% during QA.

Full-Stack Developer (Training Program) | NxtWave *Oct 2024 – Present*

- Built and shipped [N] full-stack mini-projects using Python, JavaScript, REST APIs, and SQL, establishing reusable backend patterns later applied to FastAPI service design.
- Collaborated in an Agile team environment, using Git for version control and iterative delivery across [N] sprint cycles.

PROJECTS

Shaale Vikas — AI-Assisted Crowdfunding Platform | Gemini AI · REST APIs · Firebase

- Integrated Gemini AI (LLM API) with custom prompt engineering to auto-generate campaign descriptions, cutting manual content-writing time by [X]% — a direct parallel to AI-assisted business-solution design.
- Implemented a secure REST API-based donation flow with token-managed authentication and real-time data sync via Firebase, processing [N] test transactions with zero security incidents.

GitHub Repo Insights & AI Q&A Dashboard (In Progress) | Python · pandas · SQLite · Streamlit · Gemini AI

- Building an end-to-end data pipeline that ingests repository data via the GitHub REST API, cleans and transforms it with pandas (deduplication, null handling, derived metrics), and loads it into SQLite.
- Developing an interactive Streamlit dashboard with a Gemini-powered natural language Q&A layer for querying the dataset in plain English.

EDUCATION

- **B.E., Electronics & Communication Engineering** — The Oxford College of Engineering, Bengaluru | CGPA: 8.23/10.0 | 2022–2026

CERTIFICATIONS & ACHIEVEMENTS

- Android App Development Using Gen-AI — Mind Matrix
- Full Stack Development Program — NxtWave
- Built and deployed AI-powered Android app (Shaale Vikas) integrating live Gemini AI (LLM API) in production
